***IF SOMEONE MENTIONED ANY OF THESE ISSUES IN CONVERSATION,
WOULD YOU RECOMMEND UPPER CERVICAL CARE TO THEM?***

*For the last 41 years
I've had trouble with
high blood pressure –
it's erratic & unable
to be controlled with
medication.*

*I have asthma and use an inhaler
occasionally. I also have frequent
mild headaches. I have eczema
which has been getting progressively
worse. I've also been diagnosed with
a low thyroid.*

*I've had several
"little" problems like
stomach issues, back
pain, headaches,
allergies, etc. over the
years. I just don't
feel right.*

*With two kids, my energy level
was low. We had to do infertility
with both to get pregnant. I have
PCOS, which causes me to not
ovulate on my own. I had not had
a menstrual cycle without the help
of meds in over 10 years.*

*{Side note – this patient after
10 months under care got
pregnant naturally & gave
birth to a healthy baby boy!}*

*I have severe
carpal tunnel
in my right
wrist and was
told I need
surgery.*

*I have acid reflux
and have
difficulty
sleeping, even
when I take over-
the-counter
sleeping pills.*

*I have
ongoing
sinus
infections*

*My knees hurt all the time
and I sometimes have to
get Cortizone shots for the
pain.*

Hopefully you answered **YES** to every one of them as these are quotes from our patients' testimonials regarding their health **BEFORE** Upper Cervical Care.

In **EVERY** case, patients saw dramatic reductions to complete recoveries from their ailments with Upper Cervical Care. This came from following their care plan, **NOT** by taking drugs or having surgeries.

Upper Cervical Care improves your OVERALL health.

We were created with a built-in (innate) ability to heal from all types of diseases. When there is **no** interference to the nerve system, our body is always trying to heal itself from the inside out.

Every day of our life, we are either getting healthier or sicker.
